About Me

Carousel

I was born to be a programmer.

Ohhhh! You want to know even more about me??

Well then, I was born in the Bronx, grew up in Manhattan. Have lived in New Jersey, and am currently living on Long Island.

I have my MBA from the Stern School of Business at New York University. If you bump in to me on the street, after apologizing, please feel free to ask me to show you my Beta Gamma Sigma Honor Society card.

I'm a single Dad to an amazing teenage boy (I swear it was just yesterday that he fit in to my forearm, and my thumb was as big as his foot!)

I enjoy fishing and shooting archery with my son. My love of Chinese food led me to create a blog for myself and four friends on our Quest to find the [best Chinese food on Long Island and New York City!](#)

I'm currently enrolled in the TechWorks programs at Queensborough Community College where I am honing my programming and Web Design skills.

For more information, please visit my [Contact Me](#) page. Popover w/Contact Info

American Race Horses

Why?

Because I love racehorses! Back in the day I used to own racehorses. Standardbreds. Their sheer beauty and athleticism is something to behold. I wanted to share my passion and give an introduction to the breeds of horses that are used in horseracing in America as well as some of the similarities and differences between them.

Skills Used:

- HTML5
- CSS3

Outcome:

This was the first project I completed in the TechWorks program. In this class we were introduced to HTML5 and CSS3. The project was intended to demonstrate all the syntax that we learned in class. The website doesn't look all that polished because we had to use elements that might not have necessarily been appropriate or needed for a website such as this.

I do like how the animated racehorses came out in the overlay. With a little more practice and expertise I can improve upon that animation. When I do, I will update this page.

The Website:

Click here to view the ["American Race Horses"](#) website.

The Chinese Quest

Why?

Because. Because I love Chinese food. As do four of my closest friends. And when we decided to go on a Quest to find the best Chinese restaurant on Long Island five years ago, I wanted to chronicle our adventures, and this blog is that chronicle.

Skills Used:

- WordPress
- HTML5
- CSS3

Outcome:

I'm thrilled with how the website has evolved and how it looks! Apparently, Newsday liked it so much too that they came with us a few times, and they wrote a two and a half full-color story about us! Apparently, the article was so well received that Newsday followed that up by sending a videographer who came to shot the followina video:
